

## **SPRINT PLANNING/PROGRESS UPDATE & SPRINT RETROSPERSPECTIVE**

### **SPRINT PLANNING/PROGRESS UPDATE**

We have completed the Sprint 5 with tasks:

- Remaining Task in Sprint 4 (Backends)
- Connectivity
- Functionality of pages (Homepage, User page, Admin Page)
- Finalization of User and Admin Pages Design

Tasks to be done for Sprint 6:

- Remaining Task in Sprint 5 (Backends)
- Functionality (remaining pages)
- Connectivity (remaining pages)
- Finalization of Overall pages Design

## **SPRINT RETROSPERSPECTIVE**

### **What went well?**

- In our sprint 5, we are now able to fix our folders for easy navigation, we also link the connectivity of the user login and registration. We added some of the functionality per pages.

### **What could be improved?**

- As a team, we are confused and we still have to configure the flow of the administrator end. We need to improve some more time management to get tasks done.

### **What needs to be done?**

- For our next steps, we have to complete all the pending tasks from the sprint 5 and for our sprint 6, we need to finalize the administration page.
