PROJECT PROPOSAL: PET ADOPTION SYSTEM

Our group decided to create a website about pet adoption system whereas it becomes a bridge to caring individuals looking to adopt pets.

Our goal is to make the adoption process easier and faster, making it more accessible and efficient for adopters. Users can browse different types of pets including their information such as breed, gender, age, as well as their behavior. They can also access the pets images, adoption status and proceed to an application form with their personal information and their living situation to make sure that they can provide a loving and healthy life for the pets.

We believe that every pet deserves a loving home and that every adoption should be a joyful experience.
